

PHOTOGRAPHY & FILMMAKING PROGRAM TRACK DESCRIPTIONS

General Photography Certificate

The General Photography Certificate is designed to acknowledge students who want to advance their photographic skills without following a specific track. This program is perfect for the student who desires the freedom to choose courses and recognition of program completion for their own personal advancement.

Fine Art Black & White Photography Certificate

The Fine Art Black & White Photography Certificate acknowledges students who want to improve their skills in traditional darkroom photography. By following this program track, students will learn how to operate a manual 35mm camera, process film, and create B&W prints in the darkroom. After learning the basics, students will learn how to see like an artist by experimenting with Alternative Processes and large format cameras. Students will leave the program with a Certificate and refined portfolio.

Fine Art Digital Photography Certificate

The Fine Art Digital Photography Certificate acknowledges students who want to improve their skills in digital photography. By following this program track, students will learn how to operate a digital SLR camera, light subjects with intention, and edit and organize images using image editing software. After learning the basics you will learn to see like an artist, defining your style with portfolio building courses.

Commercial Photography Certificate

The Commercial Photography Certificate acknowledges students who want to improve their skills in digital, commercial style photography. By following this program track, students will learn how to operate a digital SLR camera, light and pose subjects with intention, edit and organize images using image editing software. After learning the basics, you will begin building a commercial portfolio that will promote your future photography business.

Digital Filmmaking Certificate

The Digital Filmmaking Certificate acknowledges students who want to improve their skills in digital filmmaking. By following this program track, students will learn how to operate a digital video camera, utilize lighting and cinematography techniques, write a script, and edit films using professional software.
